

What Our Students and Parents Say

Don't take our word for it—here's what our students and parents have to say about The Whole Kid's transformative services:

"One of the things I like about your work with our son is that you don't just see a struggling student, you really see *the whole kid*."

—University School mother, Cleveland Heights

"Your ability to triage our son's specific needs was a very important first step. We could have picked a tutor on our own without professional assistance, and it would have been hit or miss. You based your selection of a tutor on our son's specific needs, and in a short period of time, his reading comprehension skills improved significantly."

—St. Edward's father, Avon Lake

"Our son said he is definitely glad he took your study skills classes. The most beneficial tool he learned is how to organize his notes. That is big for him. I think you would definitely get positive responses from other Gesu families."

—Gesu mother, University Heights

"Our son has done well in school as a result of your coaching and organizational advice. He was struggling last year and the help your group gave him last spring allowed him to finish his Freshman year on a high note and gave him the much needed confidence to start the Sophomore year well. He is engaged this year and appreciates the help."

—University School mother, Hunting Valley.

"Happy New Year and thank you so much for your help. Your tutor was a great help over Winter Break, and our son ended up with an A or maybe even an A+ in the course. We are very proud of him for getting such a good grade in a course he 'hates.'"

—Miami (Ohio) University mother, Hunting Valley

"I am writing to tell you about my test results. I really appreciate all the help you gave me. I think that the biggest and most important thing that I took away from our sessions was that I had a method for approaching the test, something that I didn't have before. I really enjoyed studying with you. Thanks again!"

—Shaker Heights High School Student, Class of 2008
